

# Vadym Foteniuk

Fullstack Developer

## Summary

I have been doing web development for about a year now. I take initiative in projects that are challenging and new to me, but I also do well with routine work that I understand. Ready to learn, develop new skills, work both for the benefit of the team and on my own commercial projects. I know a lot of technologies, I develop projects on MEVN and MERN stacks. For management I used Jira, Confluence, Bitbucket.

## Skills

HTML, CSS, Scss, mjml

JavaScript

TypeScript

React.js (i18n, zustand, ChakraUI)

Next.js

Vue.js

React Native
